Acknowledgement

I extend my sincere gratitude to Mr. Malala for his invaluable guidance and support throughout the revision process. His insights and expertise have been instrumental in refining this business plan. Thank you for your mentorship and dedication.

JUICE HAVEN BUSINESS PLAN (REVISED EDITION)

- 1. Executive Summary** Juice Haven is a social enterprise dedicated to reducing food insecurity by providing nutritious, fresh juicy fruits and surplus food distribution by enabling students and low-income individuals to request food through a digital platform. Juice Haven's innovative approach combines technology with community-driven food sharing to maximize resource utilization and minimize waste.

It will be an MKU based application that focuses on students that are disadvantaged by taking into considerations the parameters such as background and how known the student is by the local administration. The school admin will have to review factors that will help them to solicit their selection in making their grant choices.

2. Business Objectives

- Establish a reliable food request and distribution system. The system won't be a scam, it will be a registered business under the name Juice Haven, operate around MKU and its outskirts, collecting data and one to one interaction be done to ascertain the transparency of the system. It will also have to be endorsed by the university and also align with the ISO standard rules which shall be given out during
- Collaborate with local suppliers, food donors, and volunteers. The business shall encompass collaborators coming from MKU, especially the initial students that have benefitted from the food offers. These students shall help run the operations of the food offers and also to distribute food across the collection points which will be decided soon.
- Leverage technology for efficiency in food allocation and tracking. The system shall put into consideration factors such as data privacy, especially on matters of keeping the identity of the requester and the donor.
- Achieve financial sustainability through partnerships and grants. The system shall benefit from the fee imposed on the user of the system i.e a minimum cost ranging from as low as Ksh 10 to Ksh 50 that will help to run the operations of the business.

3. Products and Services

- **Fresh Juice:** A variety of fruit and vegetable-based juices, sold to support food distribution efforts. The target shall be the students who are well off and can afford to buy fruits on a regular of seasonal basis.
- **Food distribution:** Accepts surplus food from donors and delivers it to those in need. This movement might also attract donors and grants from sponsors who will help funds that can run the operations of the food aid program.
- **Technology-Driven Platform:** A digital interface for food requests, tracking, and response management.

4. Market Analysis

- **Target Market:** University students, low-income families, and the food-insecure population. We are targeting these categories since they are the immediate target market and also we are targeting students who need this aid. It will be a movement that will check in food circulation. A buyer might decide to buy for someone. Any student has a probability of being selected to get the food aid.
- **Competitive Advantage:** Unique model integrating food business with social impact, leveraging digital tools for seamless food tracking and allocation.
- **Key Partners:** Local farmers, food manufacturers, universities, NGOs, and government agencies.

5. Business Model Juice Haven operates as a hybrid model with revenue from juice sales and donations funding the food distribution initiative. The platform allows users to request food, while volunteers and food suppliers ensure efficient allocation. Sponsorships, grants, and crowd funding serve as additional revenue streams. This movement will first run in the university, sensitize the crowd before running the initial operations. However, the initial funds for startup are needed.

Subscription model might be considered soon since some categories might decide on picking fruits and buy food on a regular basis. This model shall give discounts and assured of food delivery regularly.

6. Operational Plan

- **Food Request System:** Users submit requests via the Juice Haven platform.
- **Food Sourcing and Distribution:** Partnerships with suppliers and volunteers facilitate food collection and delivery.
- **Juice Sales Strategy:** High-quality, affordable juices are sold at key locations to generate revenue.

7. Financial Plan

- **Revenue Streams:** Juice sales, grants, partnerships, and crowd funding. The platform needs funds for the initial startup as follows:

Projected Funding Requirements for Juice Haven

Category	Estimated Cost (USD)	Purpose
Technology Development	Ksh 250,000	Development and maintenance of the food request platform, hosting, and security.
Logistics & Distribution	Ksh 280,000	Transportation, storage, and handling of food donations.
Juice Production	Ksh 120,000	Procurement of fresh fruits, packaging materials, and

Category	Estimated Cost (USD)	Purpose
		juice-making equipment.
Marketing & Outreach	Ksh 90,000	Digital and offline marketing campaigns, branding, and community engagement.
Operational Costs	Ksh 110,000	Rent for small production space, utilities, and permits.
Staff & Volunteers	Ksh 110,000	Salaries for essential team members and stipends for volunteers.
Emergency & Contingency Fund	Ksh 90,000	Backup funding for unexpected costs.

8. Conclusion Juice Haven aims to create a self-sustaining ecosystem where technology, business, and social impact intersect to combat food insecurity. By fostering a culture of giving and responsible resource utilization, the enterprise will transform lives and contribute to a hunger-free society. During a discussion with Mr Malala, those were the agreed parameters that the project will cover and what operations it has to run in future. My sincerely thanks
